

ADEWUSI SAMUEL

Data Analyst/Business Intelligence Analyst

Texas • 346-562-2884 • samadewusi95@gmail.com

SUMMARY

Results-driven Data Analyst with 6 years of experience transforming complex data into actionable business insights. Skilled in SQL, Python, Power BI, data visualization, data validation, process improvement, and reporting automation, with hands-on experience across AWS, Snowflake, and Databricks. Proven ability to identify business needs, analyze trends and performance metrics, improve data accuracy, and develop dashboards and analytical solutions that increase operational efficiency. Experienced in partnering with technical and non-technical stakeholders to translate data findings into clear, practical recommendations that support informed business decisions.

WORK EXPERIENCE

Data Analyst, Bethesda Consulting Group.

Jan 2025 - Present

Analyzed large, complex datasets using SQL and Python (Pandas, NumPy) to identify trends, anomalies, and business insights that supported operational and strategic decision-making.

Developed and maintained interactive Power BI dashboards and KPI reports, transforming raw business data into clear performance metrics for leadership and cross-functional stakeholders.

Built and optimized complex SQL queries, joins, CTEs, subqueries, and window functions to extract, validate, and analyze data across multiple relational data sources.

Automated recurring data preparation and reporting workflows using Python and SQL, reducing manual reporting effort and improving the consistency and timeliness of business reporting.

Performed data cleaning, profiling, reconciliation, and quality validation, investigating discrepancies and partnering with stakeholders to resolve data integrity issues before reporting.

Translated business questions and stakeholder requirements into analytical solutions, KPIs, dashboards, and actionable recommendations, communicating findings clearly to both technical and non-technical audiences.

Worked with data stored across AWS, Snowflake, and Databricks, supporting data extraction, transformation, validation, and analysis for reporting and ad hoc business requests.

Collaborated with business and technical teams using Git and Agile workflows to document requirements, maintain analytical solutions, prioritize requests, and deliver accurate analysis within tight deadlines.

Graduate Data Assistant, Texas Southern University.

Nov 2022 - Dec 2024

Mined data to identify trends and inform business decision-making processes. Modified current systems to enhance workflows and meet new needs.

Supported data improvement initiatives by increasing automation, reducing department costs.

Developed and nurtured excellent relationships with students and staff, enhancing positive learning environments.

Data Analyst, Des Puits Limited.

Nov 2020 - July 2022

Verified and input data from external sources, confirming accuracy before integration.
Developed data architecture design to enable analysts to perform targeted customer analysis.
Coached and mentored junior analysts in data mining best practices, uplifting team capabilities.
Generated reports from extracted data for analyses.
Analysed large datasets, drawing meaningful conclusions and providing actionable recommendations.
Improved data integrity with rigorous auditing and cleansing.

SKILLS

Python	Notion
SSIS	MySql
SSRS	Excel
SSMS	Power BI

Education

Master of Management Information Systems
Texas Southern University.
Graduated with distinction
Academic honors in Data Analytics

B.Sc. (Ed.) Educational Technology
University of Ilorin, Nigeria

Core Competencies

Data Analysis and Visualization
Database Management and SQL Proficiency
Programming and Automation
Office Productivity and Collaboration Tools
Comprehensive Business Intelligence

Accomplishments

Utilized Python and SSIS to automate data extraction, transformation, and loading (ETL) processes
Developed and implemented advanced reporting solutions using SSRS and Power BI which enhanced the reporting system of the call centre of PropsGenie International
Created comprehensive data dashboards in Power BI integrated with Notion, providing real-time insights and streamlined business workflows, this process improved project
